

CBaaS - Configuration Backup as a Service

Switchshop's Configuration Backup as a Service (CBaaS) offers your organisation complete peace of mind, leaving you safe in the knowledge that whatever lies ahead, you can always get back to safety.

Whether it be your switching estate, firewall or wireless controllers, CBaaS securely backs up and stores your configurations off site, acting as the perfect insurance policy for when you need it most.

Key features include:

- Daily backups
- 1000's of supported devices
- Multiple manufacturers covered (see matrix below)
- Long retention periods
- Rapid file recovery
- Manufacturer certified help desk assistance
- Flexible subscription bundles

*Requires K9 firmware

** Devices require a minimum of SSH cli access for a device to be backed up.

** Web only switches are currently not supported

** Switchshop are unable to test every model with every firmware across all vendors portfolios, we have tested the most common devices to create the support matrix.
