switchshop
IT NETWORKING AND SECURITY

Firewall as a Service (FWaaS)

TECHNOLOGY THAT SUPPORTS YOUR MISSION

Protect What Matters Most

Charities and non-profit organisations need strong protection for donor information, financial records, operational systems and the services communities rely on. Switchshop combines next-generation firewall technology with a fully managed service, giving mission-led organisations advanced protection, expert oversight and dependable lifecycle management through one accountable UK partner.

The Challenge for mission-led organisations

- Cyber threats targeting charity data, systems and services
- Limited specialist resource within charity and non-profit teams
- Firewall estates approaching end of support
- Pressure to maintain robust controls for Cyber Essentials

More than a managed firewall

A next-generation firewall provides deeper inspection and threat prevention beyond traditional perimeter filtering. As a managed service, these controls are monitored, maintained and aligned to the needs of your charity or non-profit organisation.

Application Control
Manage the applications using your network

Intrusion Prevention
Detect and block suspicious activity

Web and Content Filtering
Reduce exposure to malicious content

Threat Intelligence
Identify emerging risks with current intelligence

Secure Connectivity
Protect sites, cloud services and remote users

Central Visibility
See risks and events across the firewall estate

IT NETWORKING AND SECURITY

Security managed through its lifecycle

From design and deployment to ongoing optimisation

How Switchshop helps

We design, deploy, monitor, manage and support your firewall environment throughout its lifecycle.

1. **Assess**
   Review your estate, risks and requirements
2. **Design**
   Select and configure the right next-generation firewall approach approach
3. **Deploy**
   Implement with clear ownership and minimal disruption
4. **Manage**
   Monitor, update, optimise and support the service
5. **Renew**
   Plan firmware, licensing and hardware lifecycle changes

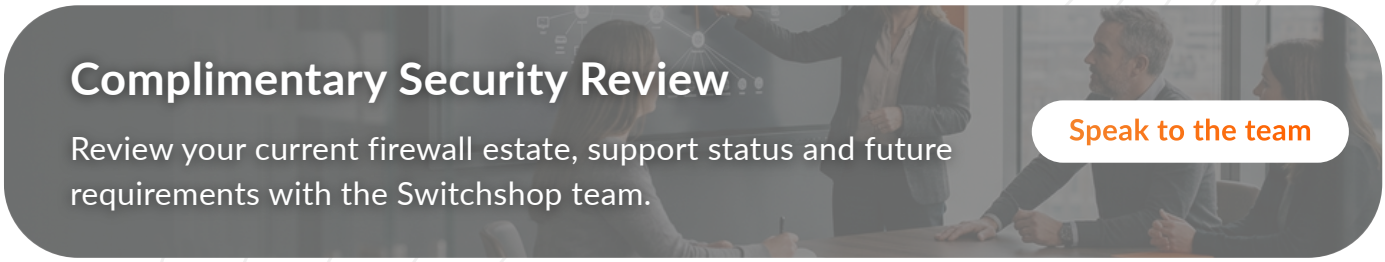

CYBER ESSENTIALS

Supporting your Cyber Essentials readiness

Technology should enable your organisation to focus on delivering outcomes, not managing complexity. Switchshop helps charities, trusts, foundations and social enterprises strengthen cyber resilience through practical, proactive security services delivered by an in-house UK engineering team.

Outcomes that matter

- **Stronger Protection**
  Layered controls for critical organisational data and services
- **Better Visibility**
  Clearer insight into risks, events and policy across the estate
- **Predictable Service**
  Clear monthly costs with one accountable security partner
- **Less Operational Burden**
  Day-to-day management handled by experienced security specialists
- **Lifecycle Confidence**
  Firmware, licensing and hardware changes planned proactively
- **Improved Resilience**
  Reduced disruption and stronger operational continuity

Complimentary Security Review
